

Connecting to the Internet at Home

- After you have established an active connection to your home network open Internet Explorer
 - Within Internet Explorer click Tools on the Menu Bar, then scroll down and click on Internet Options
 - Inside the Internet Options Menu click the Connections Tab
 - Within connections tab click on LAN settings
 - In the LAN settings menu uncheck the box under Proxy Server

- Click "OK" on both Menus and restart Internet Explorer
- When you come back in district be sure to open Tools, Internet Options, Connections, and LAN Settings to **check off** "Use a proxy server for your LAN" **otherwise you will not be able to access the internet within the district**
